MSE BRAND FEATURES & BENEFITS

Specially formulated MICR toner that meets ANSI/ABA standards to ensure proper MICR signal strength is met.

Meets all US and Canadian banking standards.

Huge profit opportunity. MICR profit margins can exceed 50%.

MSE approved this product using the markets most exhaustive testing protocols, including: environmental stress testing, accelerated aging testing, shipping simulation, and yield testing.

OEM INFORMATION

Released in April 2014, the M201 series replaces the P1606 series and the M225 MFP replaces the M1536 series.

Every aspect of our MSE brand products, from quality and reliability to aesthetics and environmental impact, is thoroughly analyzed on an ongoing basis. We look for areas of improvement beyond the industry standard and create ground-breaking technologies to keep pace with OEM design. The result is Your Best Alternative to the OEM.

We develop MICR cartridges that meet all US and Canadian banking standards for signal strength. By using a special high adhesion toner formula, designed specifically for your printer, we can significantly reduce the possibility of costly fees stemming from rejected checks. Additionally, our MICR toner contains security features that help to virtually eliminate the risk of check fraud.

Ensuring long-term quality and reliability is the foundation of customer satisfaction. We understand that without strict adherence to quality standards, you simply cannot have a product that is competitive to the OEM. Our commitment is ensured by the most rigorous 5 step QC process in the industry.
