MSE BRAND FEATURES & BENEFITS

Each MSE brand MICR cartridge is tested for signal strength on actual check stock.

This MSE brand product has been approved using the market's most exhaustive testing protocols, including: environmental stress testing, accelerated aging testing and shipping simulation.

Huge profit opportunity. MICR profit margins can exceed 70%.

Proprietary robotic routing and other conversion technologies enable immediate availability.

OEM INFORMATION

Released in September 2015, the M506 series replaces the P3015 series.

Every aspect of our MSE brand products, from quality and reliability to aesthetics and environmental impact, is thoroughly analyzed on an ongoing basis. We look for areas of improvement beyond the industry standard and create ground-breaking technologies to keep pace with OEM design. The result is Your Best Alternative to the OEM.

We develop MICR cartridges that meet all US and Canadian banking standards for signal strength. By using a special high adhesion toner formula, designed specifically for your printer, we can significantly reduce the possibility of costly fees stemming from rejected checks. Additionally, our MICR toner contains security features that help to virtually eliminate the risk of check fraud.

Ensuring long-term quality and reliability is the foundation of customer satisfaction. We understand that without strict adherence to quality standards, you simply cannot have a product that is competitive to the OEM. Our commitment is ensured by the most rigorous 5-step QC process in the industry.

ISO 9001:2008 certification is a global standard that the world's leading companies use to establish quality management system. ISO 9001:2008 connotes quality to global consumers and MSE brand adheres to these standards and strives to continuously improve, therefore providing the best customer experience.
