

## How to check your HP M404 for Auto Firmware Updates:

- Confirm your printers IP address
  - This can be found on the printer configuration page
    - You can print the config by the following menu options: OK > Setup > Reports > Print configuration page
  - On the configuration page the IP address will be #8 under product settings.
    - Should be in a <https://XX.X.X.XX> format
- Enter your IP address into your web browser
  - That will bring you to the below page.
  - Select printer update
  - Select Do not check for updates
  - Select Apply

The screenshot shows the HP LaserJet Pro M404n Embedded Web Server interface. At the top left is the HP logo and the text "HP LaserJet Pro M404n Embedded Web Server". To the right is a search bar with the word "Search" and a magnifying glass icon. Below this is a navigation bar with tabs for "Home", "Print", "Web Services", "Network", "Tools", and "Settings". The main content area is divided into eight panels:

- Sleep Mode:** A secure connection is required. Click to enable.
- Web Services:** A secure connection is required. Click to enable.
- Printer Update:** A secure connection is required. Click to enable.
- Estimated Cartridge Le...:** Shows a cartridge icon with a checkmark and the text "\*Actual levels may vary.".
- Network Summary:** Shows a green checkmark for "Connected", "IP Address: 10.2.4.18", and "Host Name: HPE07DA3".
- Print Quality Toolbox:** Run maintenance tools to improve the print quality of your printouts.
- AirPrint:** A secure connection is required. Click to enable.
- Printer Information:** Shows a green checkmark for "Sleep Mode", "Serial Number: PHBC202903", and "Firmware Version: MOGAMIXXN002.2208A.00".

- Click on "Tools" on the toolbar.
  - If the "Do not check for updates" is not selected (see screenshot below) then select and click "Apply"

## Printer Updates

### Firmware Updates

#### Firmware Version

|                  |                        |
|------------------|------------------------|
| Firmware Version | MOGAMIXXXN002.2208A.00 |
| Built Date       | 2022-02-16             |

The printer can download and install printer updates from the Internet. By downloading and installing printer updates, you agree to the HP Connected Terms of Use. For more information, visit [HP Connected](#).

#### Check for Printer Updates

HP releases printer updates to enhance the printer's features and performance. Update your printer to make sure that you have the latest firmware installed.

To check for any available updates, click Check Now.

**Check Now**

#### Printer Update Options

The printer can automatically check for updates from the Internet. If available, the printer can either install updates automatically or display an alert on the printer's control panel, giving you the option to accept or decline the updates.

Firmware updates can improve, enhance, or extend your printer's functionality and features, protect against security threats, and serve other purposes. HP recommends enabling automatic firmware updates.

Please note that this printer uses dynamic security measures to block cartridges using a non-HP chip, and periodic firmware updates will maintain the effectiveness of these measures and block cartridges that previously worked. The printer is intended to work only with new or reused cartridges that have a new or reused HP chip. For more information, go to [www.hp.com/learn/ds](http://www.hp.com/learn/ds)

- Install updates automatically (recommended)
- Alert me when updates are available
- Do not check for updates

**Apply**

**Cancel**
